# ID Flow

## Innovative Photo ID Card Software

ID Flow is Jolly Technologies' industry leading ID software solution for the management and production of secure photo ID cards. As the software of choice for Fortune 500 companies, municipalities, K-12 schools and universities, ID Flow is perfect for organizations of all sizes. Built around an advanced record management platform that can integrate with existing HR systems and featuring a powerful card designer and an easy-to-use card production center, ID Flow provides unmatched productivity and flexibility.

## Complete Photo ID Solution

- Use one of the pre-configured databases or connect live to your existing HR database
- Design professional photo ID cards in the Card Design Center
- Add text, logos, graphics, photos, signatures, biometrics, 1D and 2D barcodes and a magnetic stripe
- Enroll, lookup and manage cardholder records in the easy to use Card Issue Center
- Customize the enrollment process, optionally capture photo, signature and biometrics
- Format and arrange fields on the record entry screen with drag and drop tools
- Update records in real-time across multiple systems
- Automatically capitalize data or apply other formatting

## The ID Flow Advantage

### Getting Started Is Easy
Create new cards in minutes using the new card design wizard. Configure card production by selecting a pre-configured profile.

### Seamless Integration
Directly connect to any existing database via a live connection and integrate with existing HR, ERP, and access control databases without any importing, exporting or mapping of data. Print cards in the background from a third party or web application using the command line utility.

### Easy Card Production
Quickly enroll new cardholders, capture photo, signature and biometrics, lookup and manage existing records and print ID cards one at a time or in batches using the Card Production Center.

### Unmatched Design Tools
Design professional photo ID cards using the feature-rich design tools found in the Card Design Center. Automatically remove the background from photos and signatures, create your design using layers, use transparency effects, include 1D and 2D barcodes and a magnetic stripe. Add conditional elements that will only print when record conditions are satisfied.

### Enhanced Security
Password protect design files, create user accounts, and define user roles to make printing and data management secure.

# ID Flow

## Specifications

### Databases
- Microsoft Access
- Microsoft SQL Server
- Microsoft Excel
- Oracle
- Sybase
- MySQL
- Includes Sample Database
- ODBC / OLE DB Compliant

### Barcodes
- Code 39
- Code 128
- Codabar
- QR Code (2D)
- PDF417 (2D)
- DataMatrix (2D)
- Many More

### Image Types
BMP, GIF, JPG, TIFF, Photoshop, Many More

### Printers
- Evolis
- Zebra / Eltron
- Datacard
- UltraMagicard
- DNP
- Nisca
- Fargo
- HiTouch
- EDI Secure
- Dymo
- Laser and Inkjet Desktop Printers

### Devices
- Cameras and Webcams (TWAIN / WIA)
- Canon SLR Series: EOS Rebels
- ScanShell 800 / 1000
- SnapShell
- Topaz Signature Pads
- Integrisign Signature Pads

### Templates
- CR-80, CR-50, CR-79, CR-90, CR-100
- 2500+ Avery and Other Paper Badges

### System Requirements
- Microsoft Windows XP/2003/Vista/7
- Pentium IV 1.8 Ghz
- 1 GB RAM
- 100 MB Free Disk Space

## Available in Three Editions

- Standard
- Premier
- Report Station

*ID Flow is fully compatible with Jolly Technologies' Lobby Track visitor management software*

## Feature Highlights

- Design cards using powerful graphics and layout tools

- Add text, graphics, photos, 1D and 2D barcode, magnetic stripes, RFID, watermarks and more to the card design

- Link the card design to any database, file based, server based, LAN / WAN, or ODBC / OLE DB in real-time

- Add, delete and modify database information using the integrated database editor

- Customize record screen with drag and drop tools

- Capture photos from any TWAIN / WIA compatible camera and improve image quality using the integrated image editor

- Capture photos using a Canon EOS Digital Rebel XS, XSi or T1i digital camera

- Filter, format, and preview record information before card printing

- Print UV layers for added security

- Encode Smart Cards including MIFARE

- Conditionally print card design elements based on record values

- Design multiple card layouts within one template using conditional layers; automatically print appropriate card based upon database criteria

- Search easily for specific cardholder information from thousands of records

- Batch print groups of cards using a simple selection tool

- Import and export records and photos

- Add, manage and print ID cards using the simplified Card Issue Center

- Background print from 3rd party applications and web sites via the Command Line utility with optional XML interface

- Integrates with your access control system: Lenel, AMAG, S2, Brivo and more
